Consultant (m/f/d) Advanced Technology

WHAT YOU'LL DO

- You will take ownership of demanding assignments in strategic technology projects within the automotive and energy industry. Your responsibilities will span diverse areas, with the specific tasks depending on client needs and your individual strengths. They will include some of the following but not all within the same project:
- Lead and support consulting projects focused on battery technologies, EV platforms, and mobility innovation.
- Conduct market research, technology assessments, and competitive benchmarks to guide client strategy and investment decisions.
- Advise clients on battery system design, performance optimization, and lifecycle considerations, including sustainability and recycling.

WHO YOU ARE

- Bachelor's or Master's degree in Electrical Engineering, Mechanical Engineering, Battery Technology, or a related technical field. Business or innovation coursework is a plus.
- 3+ years of experience in electric mobility, battery systems, or automotive innovation, ideally in a consulting or strategic role.
- Strong understanding of battery technologies, including cell chemistry, thermal management, and system integration.
- Familiarity with the electric mobility landscape in North America, including key players, trends, and regulatory frameworks.
- Ability to combine technical expertise with strategic thinking, delivering value to clients through innovation and insight.
- Excellent communication skills and a collaborative mindset.
- You show strong problem-solving abilities and time management skills to help drive solutions.
