

Why P3

The unique aspect of our business is the mindset of our employees: curious, adventurous, and innovative.

P3 consultants take on early responsibilities with clients in management consulting, diverse technology topics, and scalable IT solutions.

Make a project your project. Openness for new, innovative, and unconventional approaches; short decision paths; respectful cooperation; and fruitful synergies make us a diverse, unbeatable team and successful company - worldwide.

BRANCHE: / LOCATIONS: CLUJ-NAPOCA (ROU)

Backend Engineer (Python, AWS)

WHAT YOU'LL DO

- Design, build, and operate services hosted in AWS. Work with our Detection Automation, Data Science, Attack Detection teams to build, deploy applications, data services, and data pipelines for meeting customer needs. Design, code, and test applications, data services, and data pipelines. Ensuring high quality and timely delivery. Implement solutions and pipelines from product requirements. Familiar with the challenges of architecting at scale.

WHO YOU ARE

- Are proficient in Python and AWS services. You are able to pick up other systems quickly. Are familiar with distributed data stores, Snowflake, Splunk, S3, as well as relational databases such as PostgreSQL and MySQL. You have experience with cloud and know what it takes to architect, deploy, and maintain such services. Knowledge of Docker, AWS, Snowflake, Scripting, Linux, CI/CD, Database management is a strong plus. Bachelor's degree or higher and 2+ years of professional experience as a back-end developer/engineer. You love to dig in, prototype, build, test, and see projects through to production. Prompting engineering skills; OpenAI/ChatGPT API, LangChain experience is nice to have.
