WHAT YOU'LL DO

- Analyze, document, and optimize business processes, with a strong emphasis on IT- and software-supported automation.
- Plan and manage IT-related process improvement projects from conception through implementation.
- Gather and evaluate business requirements, define objectives, and translate them into actionable project plans and process improvements.
- Create detailed documentation, including process maps, instructions, and project timelines to guide implementation and ensure alignment with business needs.
- Assess the impact of proposed changes and facilitate cross-functional collaboration to drive successful implementation.

WHO YOU ARE

- You hold a Bachelor's degree in Business Administration, Information Technology, or a related discipline.
- You bring 3–5 years of professional experience in business process consulting or IT project management, ideally within a consulting or manufacturing environment.
- You are experienced in process design, mapping, and optimization—particularly in technology-enabled business transformation.
- You have successfully led or supported IT-driven process improvement or system implementation projects.
- You work independently, precisely, and in a structured way, even under time pressure.
- You're comfortable collaborating with both business and technical stakeholders and translating between the two.
