

Why P3

Der einzigartige Aspekt unserer Unternehmensberatung liegt in der Denkweise unserer Mitarbeitenden: Neugierig, abenteuerlustig und innovationsfreudig.

P3 Beraterinnen und Berater übernehmen früh Verantwortung gegenüber Kunden im Bereich Managementberatung, bei vielfältigen Technologiethemata und skalierbaren IT-Lösungen.

Mache ein Projekt zu deinem Projekt. Offenheit für neue, innovative und unkonventionelle Ansätze, kurze Entscheidungswege, ein respektvolles Miteinander und fruchtbare Synergien machen uns zu einem diversen, unschlagbaren Team und erfolgreichen Unternehmen - weltweit.

BRANCHE AUTOMOTIVE

Software Web Backend Engineer - Charge P...

LOCATIONS: ATHENS (GRC)

WHAT YOU'LL DO

- Be part of the future mobility! For an exciting project in the context of electric vehicle charging we are looking for a backend developer to support and secure the growth of an charge point management system (CPMS) in this emerging, high-potential market. The aim of the project is to offer enterprise-specific application and service features to corporate customers within CPMS (and in some part to a fleet specific product). We want to drive the development and continuous delivery of features like e.g. rights & roles management, payment related processes & tariff management, adaptations of user interface for large charging parks, reporting & data visualizations for our client in the automotive domain.

WHO YOU ARE

- Deep understanding of Javascript and Node.js
- Fluent usage of object relational mappers (ORM)
- Knowledge in MySQL and Redis
- Hands-on testing mentality paired with a deep know-how of testing utils and methods (unit, end 2 end)
- Knowledge of microservice architecture and self-contained systems
- Knowledge of orchestrating cloud infrastructure and containers (i.e.: Docker, Kubernetes, etc.)
- Api-first mind-set with SAGA pattern or knowledge in event streaming (i.e.: RabbitMQ)
- Professional working with web communication standards (REST, OpenAPI)
- Firm with running production-ready solutions on one of the cloud platforms AWS or Azure
- Firm with Continuous Integration and Continuous Development tools to manage source code, build artifacts and deploy into an infrastructure (i.e.: AWS CodeBuild, AWS Development Kit)
