

## Why P3

Der einzigartige Aspekt unserer Unternehmensberatung liegt in der Denkweise unserer Mitarbeitenden: Neugierig, abenteuerlustig und innovationsfreudig.

P3 Beraterinnen und Berater übernehmen früh Verantwortung gegenüber Kunden im Bereich Managementberatung, bei vielfältigen Technologiethemata und skalierbaren IT-Lösungen.

Mache ein Projekt zu deinem Projekt. Offenheit für neue, innovative und unkonventionelle Ansätze, kurze Entscheidungswege, ein respektvolles Miteinander und fruchtbare Synergien machen uns zu einem diversen, unschlagbaren Team und erfolgreichen Unternehmen - weltweit.

BRANCHE AUTOMOTIVE

## Java / Python Web Engineer - Charge Poin...

LOCATIONS: ATHENS (GRC)

### WHAT YOU'LL DO

- Using Java or Python to build cloud-native solutions, supporting green energy, and integrating your work with Teslas, Jaguars, Audis and many more prestigious car brands...are your fingertips vibrating yet? We do not know if our bones are physically green, but our mission certainly is: to offer the best software solutions for the biggest challenges facing the transition to EVs and renewable energy with our True Smart Charge functionality. As a member of our development team, your tasks will include leading the effort to bring True Smart Charge into all charge points, thereby helping shape True Energy's charging network. Become an integral part of our international team of electric car, automation and smart grid experts based in several European countries. Grow and develop the foundation for the energy grid of the future while supporting our joint, green transition. All while developing your professional skill set in an organization that prides itself on giving team members responsibility and room to grow.

### WHO YOU ARE

- You are at home in Python's or Java's asynchronous ecosystem, Linux & in the cloud
- You know your way around PostgreSQL, Redis & Docker
- Knowledge of microservice architecture and self-contained systems
- You have a DevOps mindset & an understanding of good software development life cycle, from clarifying requirements to monitoring live environments
- Your experience enables you to develop solutions as well as operate them yourself
- You adhere to software craftsmanship rules and, at the same time, have an anti-dogmatic approach to good ideas, DDD, TDD, FP and similar abbreviations
- Firm with Continuous Integration and Continuous Development tools to manage source code, build artifacts and deploy into an infrastructure (i.e.: Azure DevOps, Terraform)
- You will get extra credit for
