

## Why P3

Der einzigartige Aspekt unserer Unternehmensberatung liegt in der Denkweise unserer Mitarbeitenden: Neugierig, abenteuerlustig und innovationsfreudig.

P3 Beraterinnen und Berater übernehmen früh Verantwortung gegenüber Kunden im Bereich Managementberatung, bei vielfältigen Technologiethematen und skalierbaren IT-Lösungen.

Mache ein Projekt zu deinem Projekt. Offenheit für neue, innovative und unkonventionelle Ansätze, kurze Entscheidungswege, ein respektvolles Miteinander und fruchtbare Synergien machen uns zu einem diversen, unschlagbaren Team und erfolgreichen Unternehmen - weltweit.

## Technical Project Manager (m/f/d) Percep...

LOCATIONS: ATLANTA (GA, USA); CALIFORNIA (USA); DALLAS (TX, USA); DETROIT (MI, USA); ORLANDO

### WHAT YOU'LL DO

- You lead Perception software development projects through all phases of the software lifecycle in the emerging field of autonomous driving, you engage with other Technical Project Managers and represent Perception in all technical aspects of development
- You are responsible for planning, monitoring, controlling, and completing the projects from early stages until series production always with respect to budget, KPIs and deadlines ensuring all features are delivered with the highest quality and meet all requirements.
- You facilitate project meetings, and are responsible for the schedule, minutes, summaries, updates and follow up with important decisions and actions, you also work cross-functionally with other product and technology teams supporting collaboration, driving implementation activities, and finding solutions for any gaps.
- You oversee all technical alignment with other projects within a software development program including systems engineering and architecture, requirements management, safety plans and software integration architecture in compliance with ASPICE.
- You are responsible for the risk management, you track results of all required tests, analyze release blockers, and enable successful resolution.
- You prepare and disseminate project status reports, including KPIs.
- You support continuous improvement by evaluating existing processes, benchmarking, and assessing new opportunities, and implementing new strategies, and procedures.
- You build up an engineering network by establishing new contacts and maintaining relationships and partnerships with key stakeholders, you market and demonstrate the software products seeking new business opportunities and project launches
