

Why P3

The unique aspect of our business is the mindset of our employees: curious, adventurous, and innovative.

P3 consultants take on early responsibilities with clients in management consulting, diverse technology topics, and scalable IT solutions.

Make a project your project. Openness for new, innovative, and unconventional approaches; short decision paths; respectful cooperation; and fruitful synergies make us a diverse, unbeatable team and successful company - worldwide.

BRANCHE: IT_MEDIA / LOCATIONS: ATHENS (GRC)

DevOps Infrastructure Engineer

WHAT YOU'LL DO

- Setup CI/CD and custom infrastructure environments for our P3 teams and our clients
- Use automation extensively to deploy, configure, manage, and monitor systems in support of our products and their development teams
- Support the team's continuous integration and continuous deployment initiatives
- Contribute to service capacity planning and demand forecasting
- Resolve service problems
- Evaluate and evolve ongoing design, architecture, standards and methods for P3 infrastructure and systems

WHO YOU ARE

- Experience with Linux/Unix administration
- Experience with cloud infrastructure (i.e.: AWS, Azure, GCloud)
- Experience with CI/CD tools (i.e.: Jenkins, MS DevOps – Pipelines, Gitlab)
- Experience with high availability, high scalability and resilience strategies
- Knowledge of Docker and Kubernetes is a plus
- Ability to openly debate technical decisions
- Understanding of version control systems (GIT)
- Network stack and security awareness are a must
- Fluent English communication skills
- Strong communication skills to empower distributed teams
- Ability to read, write and review automation code
- Experience in use of configuration management tools
- Knowledge of scripting & markup languages (i.e.: Bash, YAML, JSON)
