## **2. Main Principles**

With our commitment to ecological sustainability we assume social responsibility. Our target is to create an environment that minimizes our impact on the climate.

Our environmental guidelines are binding for all our employees and partners.

P3 is committed to act in harmony with environmental awareness. We are committed to comply with the relevant laws and regulations as well as the requirements set by our stakeholders with regard to environmental protection. To this end, we continuously identify our stakeholders and review their environmental policy requirements. We also set ourselves additional goals that go beyond the provision of our services.

We have defined the following binding guidelines to realize our claim:

## **3. Environmental Impact**

In the performance of our services, we always strive to avoid or minimize the environmental impact of waste, wastewater, emissions and noise.

## **4. Resources**

We use natural resources such as energy and water sparingly and monitor their use.

## **5. Water and Air Quality**

We pay attention to good water and air quality for our employees and our environment.

We promote environmentally compatible handling of chemicals and other environmentally harmful substances and act in accordance with the RoHS Directive, REACH regulation and other applicable laws

## **6. Environmental Awareness**

We promote environmental awareness among our employees. To this end, management supports environmentally friendly initiatives and participation in environmentally relevant training and further education.

## **7. Continuous Review**

We continuously review our environmental aspects, identify the relevant ones and implement measures to improve our environmental performance.
